DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 are drawn to a pharmaceutical composition comprising at least one polymethoxyflavone and a suitable pharmaceutically acceptable diluent, carrier or adjuvant, classified in class 514, subclass 456.
- II. Claims 8-23 are drawn to the use of and a method of treating a mammal having abnormalities resulting from insulin resistance comprising administering at least one polymethoxyflavone compound, classified in class 514, subclass 456.

The two inventions are independent and distinct, each from the other as they have acquired a separate status in the art as shown by their different and separate subject matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

The applicants are required to elect a single invention for examination purposes.
